

SOHAM MONDAL

Cloud Automation & AIOps Engineer | Agentic AI · RAG · Azure · OCI

+91 7679565815 | sohamritmondal@gmail.com | linkedin.com/in/soham-mondal-939511230

sohamritmondal.github.io/Soham_Portfolio | Bengaluru, Karnataka, India

Member: All India Oracle Users Group (AIOUG)

Claude Certified Architect – Foundations | Oracle AI Vector Search Certified | Google Cyber Security Professional

PROFESSIONAL SUMMARY

Associate Software Engineer at Unisys with 1+ year of experience building cloud automation, AIOps solutions, and production-grade LLM systems on Azure and hybrid environments. Experienced in LLM fine-tuning, building Agentic AI workflows, and optimising RAG solutions with semantic caching using Oracle 23AI and Azure AI Search. IEEE-published researcher, Claude Certified Architect, and active AIOUG member.

EDUCATION

New Horizon College of Engineering

2021 – 2025

B.E. in Computer Science Engineering | CGPA: 8.99 / 10.0

Bengaluru, India

- Visvesvaraya Technological University (VTU) | Coursework: Data Structures, Algorithms, DBMS, Machine Learning, Software Engineering

TECHNICAL SKILLS

Agentic AI & RAG: Agentic Workflows (Agno / Phidata, CrewAI), RAG Optimisation, Semantic Caching (Qdrant, Oracle 23AI, Azure AI Search), Vector Search, Context Management (MongoDB), MCP (Model Context Protocol), Apache Airflow

Cloud & Automation: Microsoft Azure, Azure AI Foundry, Azure DevOps, Oracle Cloud Infrastructure (OCI), Ansible, PowerShell, DPA, Site24/7, ServiceNow

Languages & Frameworks: Python (pandas, numpy, scikit-learn, OpenCV, TensorFlow, Flask, FastAPI), JavaScript, Java, HTML/CSS, N8N

ML & Computer Vision: CNNs, Real-Time Gesture Recognition, Supervised Learning, Data Analysis (Matplotlib, NumPy, Pandas) | **Tools:** Git, GitHub, Jupyter, VS Code, Azure DevOps, Site24/7, SQL Server, Oracle DB

EXPERIENCE

Unisys

Aug 2025 – Present

Associate Software Engineer

Bengaluru, India

- **Agent-based DB patching automation** on Azure and OCI using Python, Ansible, and PowerShell — reducing manual infrastructure intervention by ~40% across enterprise client environments.
- **Agent-based SQL Server database health checks** with ML-based anomaly detection on Azure infrastructure metrics, leveraging Azure AI Foundry and DPA for real-time monitoring, index recommendations, and performance tuning.
- **Azure SRE agent for automatic ticket remediation** using RAG-based knowledge sharing — autonomously resolving P3/P4 tickets and surfacing critical context for P1/P2 incidents in seconds, reducing MTTR by ~40%.
- **Real-time ticket analysis dashboard** integrated with ServiceNow using Claude API, Agno, and CrewAI for intelligent IT incident triage and routing across 17 client accounts (2,000+ monthly tickets).

Unisys

Oct 2024 – Jul 2025

CA&I Intern

Bengaluru, India

- **Automated IT operations data** using Python with intelligent normalisation, deduplication, and LLM-based classification.
- **PowerShell scripting to patch on-premises Oracle databases**, reducing manual patching effort and patch cycle time.
- Contributed to **cloud migration analysis** for workloads moving to Azure and OCI, supporting architecture decisions for 5+ enterprise clients.

Lakshya Space

Sep 2023 – Oct 2023

Data Analysis Intern

Bengaluru, India

- Performed rocket engine pressure **data analysis and predictive modelling** in Python using Matplotlib, NumPy, and Pandas; findings informed real-world propulsion engineering decisions.

PROJECTS

ML-Based Sign Language Detection | IEEE Published

github.com/sohamritmondal/Web_Base_Sign_Language_Translation

Python · CNN · TensorFlow · OpenCV · FastAPI

- **Built a real-time web-based Sign Language Recognition system** using CNNs trained on a custom self-collected dataset — published at IEEE ICOCT 2025 (DOI: 10.1109/ICOCT64433.2025.11118370).
- **Achieved 93% classification accuracy**; integrated gesture and speech modalities for enhanced accessibility across the full ML lifecycle: data collection, augmentation, CNN design, training, and web deployment.

Car Racing Game with Leaderboard

github.com/sohamritmondal/Car_Racing_Game_JAVA_MySQL

Java · Swing · MySQL · OOP

- Full game with collision detection, real-time scoring, and persistent leaderboard — integrating Java OOP with MySQL for player achievement tracking.
